

LIST OF MEDICAL OXYGEN GENERATORS

Version 12
25-Jul-2024

The list is a consolidated list of medical oxygen generators compliant with The Global Fund Quality Assurance Requirements. It is developed as a tool to assist Principal Recipients (PR) of Global Fund grants in procurement.

Important Note

This list may be used by Principal Recipients of the Global Fund grants when considering options with respect to procurement of oxygen generators. The list aims at providing countries with information that will assist them in their procurement options. Please note that the list is not designed to replace any applicable and legally required procurement processes. The Global Fund requires its grant recipients to comply with applicable procurement laws and provides the list only for the identification of products/manufacturers that comply with the Global Fund's requirements. It is important that the product selected is compliant with the Global Fund's requirements (refer to the QA policy for Medical Devices (including In-Vitro Diagnostics) and Core PPE at <https://www.theglobalfund.org/en/sourcing-management/quality-assurance/medical-devices-and-core-personal-protective-equipment/> and Guide to Global Fund Policies on Procurement and Supply Management of Health Products at <https://www.theglobalfund.org/en/sourcing-management/updates/2021-06-21-updated-guide-to-global-fund-policies-on-procurement-and-supply-management/>).

Furthermore, the Principal Recipient should not rely solely on the information provided in the list but should obtain evidence of products compliance with the Global Fund's requirements at the time of the procurement. For the above reasons, we strongly encourage users to ensure they are using the most recent version on our website when conducting procurement.
